

Wall Hugger Tilt-in-Space

primacare
Seating Experts in Assistive Technology

The Wallhugger Tilt-in-Space action is a brand new unique action combining the benefits of tilt in space within the constraints of a confined space

A simple 2 button controller is used to control all the motors. The advantages over a traditional wallhugger action are greater smoothness in operation and increased stability when in the rise position.

- High Leg lift.
- Stress free recline.
- High get out position with option of Variable Angle Lift.
- Weight capacities up to 35 stone.
- Low Profile options down to 16" seat height.
- Seat widths up to 30" wide.

*Can be positioned
just 6" from the wall*
